

Now, simple-to-use, next-generation software makes the proven KODAK PROFESSIONAL HR 500, HR 500 Plus and HR Universal Film Scanners ideal for high-volume, stand-alone applications.

High-res, stand-alone scanning made simple.

Our new KODAK PROFESSIONAL HR Scanning Software offers all this:

- **KODAK Image Science** and industry-standard ICC color management produce top-quality TIFFs and JPEGs.
- **DIGITAL ICE Enablement**—DIGITAL ICE Technology for dust/blemish removal on our range of HR Scanners.
- **An automatic default** for most common film type/size channels with the ability to create new channels easily.
- **An advanced SBA (Scene Balance Algorithm)**—with many customizable parameters—that leads to beautiful flesh tones, greater first-scan yields.
- **Many built-in image-processing functions;** most can be customized to suit specific needs.

- **The ability to drive our HR AutoStrip Gates and HR AutoSlide Automation Accessories.** The HR Long Roll Accessory requires KODAK PROFESSIONAL Digital Print Production Software (DP2) or KODAK PROFESSIONAL HR Scanning Software LR (Europe only).

- **Range of output file formats** allow a range of scan-to-archive and complete workflow applications.

From scanning and manipulation to printing, storage and beyond, Kodak offers a range of flexible and scalable Modular Digital Workflow Products that can help you build a powerful, promising digital future. To learn more, visit www.kodak.com/go/prolab

Simple software that unleashes the power of HR scanning.

Our new HR Scanning Software features a user-friendly interface that can be tailored to suit changing needs and the level of sophistication of various operators.

When combined with our Automation Accessories, our new Scanning Software lets you load film, click on "Scan," and walk away. With this kind of minimal operator involvement, you can lower your labor costs and dedicate your people to more productive tasks.

The simple, intuitive interface makes the HR Scanning Software remarkably easy to use.

Advantages

Productivity:

- On-screen preview of complete film rolls.
- Useful image-processing functions include:
 - Unsharp masking
 - Cropping
 - Preview thumbnail generation
 - Flipping of mirror images
- A thumbnails bar shows images already scanned; enables rapid editing allowing you the possibility to correct images without the need to rescan.
- A new Click Black-Click White utility which allows the operator to stretch the final image histogram over the full length of the tone scale, providing richer contrast. In addition it is possible to neutralize the black and white tones.
- A "go-to-frame" function for quick scanning when only specific frames in a strip are required.
- Seamless integration with KODAK PROFESSIONAL Color Management Software giving you the confidence of WYSIWYG performance.
- Accessory drives can be changed in seconds without having to close the software application.

Flexibility:

- Shares information with existing infrastructure for integration into your workflow.
- Secondary image generation for Internet/CDs.
- Automatic scanning of 35mm and 120/220 strip film: color negative, color reversal, black and white.

- Automatic scanning of 35mm mounted slides.
- User-definable Film Channels.
- A new order export utility to support workflows with the new KODAK PROFESSIONAL Digital Analyzer Workstation and some OEM data systems.
- Outputs a range of file formats including JPEG, TIFF and Image Pac.

Specifications

Compatibility:

- KODAK PROFESSIONAL DP2 Software and KODAK PROFESSIONAL HR Scanning Software are engineered to drive the KODAK PROFESSIONAL HR 500, HR 500 Plus and HR Universal Film Scanners, HR AutoStrip Gate and HR AutoSlide (HR Scanning Software only) Accessories.
- KODAK PROFESSIONAL DP2 Software and KODAK PROFESSIONAL HR Scanning Software LR (Europe only) are engineered to drive the HR Long Roll Accessory.

Minimum System Requirements:

- 1.5 GHz PENTIUM 4 PC with WINDOWS 2000 Operating System or XP Professional Operating System
- 40 GB hard drive (ATA-100 minimum)
- CD-ROM drive
- 512 MB RD RAM
- High-speed Internet connection
- 19" or larger color monitor
- 24-bit color display card
- Disk space: 10 GB

Support:

- High-speed Internet connection: ISDN or faster recommended
- Telephone support
- On-site assistance
