

# Rack Washer Model R-2

The R-2 is for cleaning racks of roller transport machines and is particularly appropriate for the Kodak Versamat® processor. Every surface where dirt can collect is reached by this unit, which rotates the racks in various chemical solutions on a programmed basis and at a high agitation rate. After this sequence neutralizing solution is pumped in followed by water for a final rinse.

The R-2 Rack Washer has a distinct advantage over ultrasonic types of cleaners which vibrate mechanical parts loose and therefore require careful checking and retightening after the cleaning process is complete. There are also obvious thoroughness and labor-saving benefits over hand washing and scrubbing.

#### Placement

This is a roll-away unit and does not need to be hooked up to utilities permanently

#### Dimensions

Length — 40½" (102.9cm)  
Width — 30" (76.2cm)  
Height — 52" (132.1cm)

#### Construction

Manufactured with #316 stainless steel, has non-corrosive plumbing and is set on casters for easy maneuverability

#### Power Supply

Electrical connection by line cord plugged into 115 volt AC 20 amp

#### Water Supply

5 gallons (18.91 liters) per minute to single connection

#### Drain

Floor drain
