

# Brooke BP400

## 4-inch Precision Automatic Print Cutter

### Brooke Engineering has again delivered high performance precision and affordable price.

Introducing the Brooke BP400 4-inch automatic print cutter, the newest addition to our BP Series of automatic cutters. The BP400 handles 2-inch thru 4-inch wide paper. That makes the BP400 a perfect choice for high production cutting of photofinishing, business cards, I.D. cards, greeting cards, photo composites, sports/trading cards, and more.

### Efficiency

Made with the same high quality and maximum performance of our field-proven BP1200 and BP2000 cutters, the BP400 has a pre-feed system for high speed single or double-cutting. Production figures are:

Length of Print	Approximate cut rate/hour
5 inches	10,300 prints
3.5 inches	11,600 prints
2 inches	13,500 prints

### Designed To Keep Running

All of the Brooke BPs are state-of-the-art microprocessor controlled. Precision cutting accuracy is our specialty with stepper motor drive, accurate to  $\pm .010$  inches. Cutting with any type of mark is possible for the BP400, whether cutting punch marks, graphite or optical, a sensor is available. Every cutter is equipped with a transmissive sensor for 100% no-miss accuracy on punch hole markings.

End-of-order programming aids to complete maximum efficiency without production bottlenecks. Sensors, pressure rollers, and paper guides on the BP400 are adjusted quickly and easily for various roll widths, and sensor changing for various marks can be done in just seconds.

### Operator-Friendly Simplicity

The BP's digital control console provides nearly every control an operator will ever need. A variety of self-test adjustments and operating functions are pre-programmed into the memory. Others have their own clearly labeled push buttons so every operation is as simple to complete as using a calculator.

### Profitable Combination

That's what the speed, accuracy, efficiency and reliability of a Brooke BP400 can do for you cut-after-cut. See how the BP400 can cut thru your production faster today, and complete the combination of quality and profitability you've been waiting for.

### BP400 SPECIFICATIONS

#### Cutter Dimensions:

Length	14"
Width	40"
Height	14"
Weight:	56 lbs.
Paper Width	2"—4"
Paper Length	775 ft. roll
Electrical Requirements	110 to 125-Volt AC, 50/60 Hz, 500W
