

DIGITAL COLOR PRINTER FOR INDEXPRINT™

The DCP-648 prints thumbnail size images of every frame from a roll of 135 film. A single 3 1/2" x 5", 4" x 6" or HD proportion print contains the entire roll of film. Each print includes up to 40 frame format, selected automatically according to the size of the roll. Frames and frame numbers are printed in order so it's easy to select and identify frames for enlargements or reprints. There is also a space provided so customers can title or comment on the events portrayed.

The DCP-648 can easily be attached to compatible printers or to the DCS-390 for a stand-alone index print system.

25 Frame

40 Frame

Print Capacity.....41 prints per hour, 86 seconds per print (4" x 6" format)
Power Requirements.....AC 100V through 240V 50/60Hz
