IP-64

The IP-64 is a compact dye-sublimation printer that delivers fast, high quality output for on-demand printing applications.
Connect the IP-64 to a CT-2 or PC for an excellent entry-level digital printing solution.

Features
High-Speed Printing
The IP-64 produces a 4 x 6 print in 8 seconds. A high speed USB 2.0 connection provides a fast transfer of image data.

High Quality Prints
The IP-64 produces crisp and vivid prints with natural, continuous tones.

Easy Installation
The unit features an ultra compact footprint of approximately 1.4 square feet and is conveniently front-loading, allowing for flexible installation in almost any counter-top retail environment.

Multiple Connection Patterns
The IP-64 can be used to make prints from Noritsu's CT-2 Consumer Terminal or from a PC with Noritsu software installed. Up to two IP-64 printers can be connected to a single order input terminal.

Specifications
Printing Method (Dye Sublimation)
